For the third segment of the I-64 Widening Project, a 12-foot-wide travel lane and 12-foot-wide shoulder will be added on I-64 in each direction for approximately 8.25 miles.

In addition to constructing the new lanes, the existing pavement will be demolished and replaced, on- and off-ramps will be lengthened, and the I-64 east exit ramp to Route 143 will be widened, realigned, and signalized.

There is approximately 5,100 feet of noise barriers anticipated (studies underway), right-of-way acquisition anticipated from nine properties, and landscaping plans to be developed for screening and reforestation also included in the $178,281,690 design-build contract.
Project Schedule

Contract Award – December 7, 2017
Field Surveys – January 2018 thru June 2018
Design – January 2018 thru November 2018
Construction Begins – July 2018
Right-of-Way Acquisitions Begin – October 2018
Final Completion – September 24, 2021
